DATA Comparison

While looking at data from the previous three years, it is evident staff along with the family members are more educated about PREA we also have 8 more cameras than we had in the past.. It is apparent reporting mechanisms are visible to both staff and family members as Connections Corrections Program East has taken a pro-active role in attempting to reduce prison rape. The code of silence still exists for family members and staff alike however when comparing results to previous years its shows both are reporting. Retaliation is monitored and no reports of retaliation have been reported. Connections Corrections East has made sure all staff members using our vehicle sign in and out in the Log book and record destination and mileage to and from their destination. We are an all male facility and only male staff transport family members. We have added (8) new cameras installed toward the end of 2016 to aid in the detection, prevention and response to any PREA issues.

Pursuant to PREA standards for data review (§115.288), the following will serve as an annual review for 2017 in order to assess and improve the effectiveness of Connections Corrections Program sexual abuse and sexual harassment prevention, detection, response policies and training.

Connections Corrections Program East completed its first audit regarding the level of compliance with implementation of 39 PREA Standards, which includes compliance of many subsets of each standard on April 22-25, 2016. Loree Ivanets, DOJ Certified PREA Auditor of Dickenson, North Dakota oversaw the completion of the audit.
